Platform	MetaTrader 5 (MT5)
Developer	Kamran Ali Developer
Version	v1.00
Release Date	October 2025
Category	Multi-Strategy Expert Advisor / Risk Management EA

■ Overview

Aurora Premium EA is an advanced algorithmic trading system engineered for MetaTrader 5. It combines multiple market strategies including trend-following, scalping, mean reversion, and breakout logic. Its adaptive AI-powered core continuously optimizes trade entries and exits to maintain profitability under changing market conditions.

■ Key Features

■ Hybrid Strategy Engine – Trend, Scalping, and Reversion modes
■ Smart Risk Management – ATR-based SL/TP with auto lot sizing
■ Multi-Symbol Trading – Supports Gold, Forex, and Indices
■ Built-in News Filter – Avoids trading during volatility spikes
■ Real-Time Dashboard – Displays DD%, trade stats, and equity
■ Full Backtest & Optimization Support

■■ Installation

1■■ Copy **AuroraPremiumEA.mq5** into **MQL5/Experts/**
2■■ Compile in MetaEditor (F7)
3■■ Attach EA to desired chart
4■■ Configure risk, strategy, and timing settings
5■■ Enable **AutoTrading**

■ Configuration

RiskPerTrade = 2.0 MaxOpenPositions = 3 UseATR = true ATRMultiplier = 2.5 TrailingStop = true StartHour = 8 EndHour = 18 AvoidNews = true

■ Performance & Testing Results

Tested across 2 years of XAUUSD data (2023–2025):
■ Profit Factor: 1.68
■ Average Win Rate: 66%
■ Max Drawdown: 16.5%

■ Sharpe Ratio: 1.12
■ Backtest Quality: 99.90% tick data

■ Client Benefits

■ Universal – Works with all MT5 brokers

■ Smart Adaptation – Adjusts to volatility & trends

■■ Fully Automated – Plug and trade simplicity

■ Transparent – Detailed performance tracking

■ Safe – Equity and daily loss protection
